

The Application of Mysticism Statements in the Theological Reflections of Mullah Mohammad Hassan Herdengi

Akram Naseri¹

Abstract

There is close relationship between mysticism and speech and some talkers use capability of mysticism themes for obtaining their knowledge purposes. Application of mysticism statements in speech is a main issue which is not examined thoroughly. So performing case studies in this realm and examining the activities of talkers used this approach can be helpful in detecting this approach. The current research concentrates on one of speech works of Shia scientists considers analysis and survey of mysticism approaches and their position in speech issues in order to evaluate the factors of this approach and its role in effectiveness and intricacy of speech issues. Findings of this research indicates that we can use Herdengi's approach in speech thoughts frequently in issues like cognition ways, essence and self-existent and combined application of these concepts between mysticism-speech and historical approach. Documents of Herdengi narrations especially related to mysticism meanings are among his stylish traits. The results of this research indicate that this style of author is so effective in intricacy and effectiveness of speech issues.

Keywords: Mohammad Hassan Herdengi, Speech, Mysticism Approach, Speech Thoughts.
